Professional Summary

Full Stack Developer specializing in MERN Stack Development, RESTful API Design, JWT Authentication, and Generative AI-powered applications. Experienced in designing and deploying production-grade systems using MongoDB, Express.js, React.js, Node.js, and the Gemini API. Built an AI-driven job-preparation platform automating skill-gap analysis and ATS resume generation, and delivered a production-grade e-commerce system for real customers.

Technical Skills

Languages: JavaScript (ES6+), Core Java, Python
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend: Node.js, Express.js, Django, REST APIs, JWT Auth, bcryptjs, MVC Architecture, Server-Side Development
Databases: MongoDB, Mongoose ODM, PostgreSQL, MySQL, JDBC
Payments & Tools: Razorpay, Cloudinary, Puppeteer, Git, GitHub, Linux, Postman, VS Code, AWS, Render, Vercel
Software Engineering: System Design – concepts and practical implementation, Data Structures & Algorithms: Python — Arrays, Strings, Sliding Window, Two Pointers, Linked Lists, Recursion, Sorting/Searching (LeetCode)
Methodologies: Agile Development, Scrum
AI/ML Concepts: Generative AI, Agentic AI, LLM Integration & Orchestration, Retrieval-Augmented Generation (RAG), Hugging Face Transformers, Gemini API Integration, Prompt Engineering, ATS-Optimized Content Generation

Internships

Full Stack Java Developer Intern **May – Jun 2025**
SkillDzire
- Built full stack web applications using Core Java, JDBC, MySQL, and Spring Boot; implemented RESTful backend modules, MVC architecture, and CRUD operations

Web Development Intern **Jul – Aug 2024**
SmartBridge
- Built responsive, cross-browser UI components with HTML5, CSS3, and JavaScript using Flexbox and CSS Grid

Projects

Gen AI-Powered Full Stack Job Preparation Application **Jun 2026 – Present**
Node.js, Express.js, React.js, MongoDB, Gemini API, Puppeteer
- Engineered an AI-driven career insights engine that lets users upload resumes and job descriptions, performing automated skill-gap detection and generating customized interview questions
- Built an ATS-optimized resume generator using the Gemini API for intelligent content analysis and rewriting, with Puppeteer converting output into downloadable, styled PDFs
- Designed a secure, production-ready architecture with JWT-based authentication, token blacklisting, and a clean 4-layer separation for maintainability

NatuKodi – Country Chicken Farm E-Commerce Platform **Jan – Jul 2026**
MongoDB, Express.js, React.js, Node.js, Razorpay | natukodi-frontend.vercel.app
- Architected and deployed a production-grade MERN e-commerce platform with authentication, product catalog, cart, order management, weight-based pricing, and delivery slot booking across 20+ REST API endpoints
- Integrated Razorpay payments, Cloudinary image optimization, and OTP-based password recovery
- Deployed backend on Render and frontend on Vercel with MongoDB Atlas, using lazy loading and caching for performance

Certifications & Achievements

- **Oracle Cloud Infrastructure 2025 Certified GenAI Professional**
- **JavaScript – Google Developer Groups (GDG) CSMU**
- **24-Hour SEO-Friendly Website Hackathon** (Mar 2025)

Education

Chaitanya Engineering College **Visakhapatnam, India**
Bachelor of Technology in Computer Science & Engineering – ***CGPA: 7.96/10.0*** Aug 2022 – May 2026
