PROJECTS

Animal Species Detection – YOLOv8 [GitHub](#) | *Python, YOLOv8, OpenCV, Django*

Nov 2025 – Apr 2026

- Developed a real-time multi-class animal species detection system using YOLOv8 (CNN-based); applied data augmentation and preprocessing achieving 76.3% mAP@0.5 across 19 species classes
- Evaluated model using Precision, Recall, F1-score, and mAP; deployed as a Django REST API for live browser-based inference with real-time image processing

Chatty – Real-Time Messaging App [Live Demo](#) | *MongoDB, Express.js, React.js, Node.js, Socket.io*

July-Aug 2025

- Built a production-deployed MERN app with JWT authentication, bcryptjs password hashing, protected middleware, and Cloudinary-powered profile uploads; deployed on Render & Vercel
- Implemented real-time bi-directional messaging via Socket.io (WebSockets); managed persistent data with MongoDB/Mongoose schemas

BitLinks – URL Shortener [GitHub](#) | *Next.js, Tailwind CSS, JavaScript, REST API*

June 2025

- Built a full stack URL shortening web app using Next.js (App Router) and Tailwind CSS with REST API endpoints for creating, managing, and redirecting short URLs
- Designed and tested API routes using Postman; leveraged Next.js server-side rendering for fast page loads and SEO optimization

PassOP – Password Manager [GitHub](#) | *React.js, Node.js, Express.js, MongoDB*

May 2025

- Built a secure MERN password manager with RESTful CRUD APIs; implemented per-row show/hide toggle with stable UUID key management and full mobile responsiveness

INTERSHIPS

Full Stack Java Developer Intern | *SkillDzire*

May – June 2025

- Built backend web apps using Core Java, JDBC, MySQL, and Spring Boot; implemented MVC architecture, server-side business logic, and database CRUD operations

AI/ML Intern | *Edunet Foundation*

May – June 2024

- Trained supervised ML models (Decision Trees, Random Forest, Linear Regression) using Python & Scikit-learn; performed EDA, feature engineering, and model evaluation

Web Development Intern | *SmartBridge*

July – Aug 2024

- Designed responsive, cross-browser UI components using HTML5, CSS3, and JavaScript following accessibility and SEO best practices
